

DECATHLON

Foot warmer :

Adhesive. Single use. Provides comfortable warmth (minimum 5h) during outdoor activities.

Directions for use:

Remove the warmer from the packaging and leave it at 20°C for 10 min: time and temperature needed for the activation of the product. Stick it on the socks on the top of toes. Put your shoes on.

After use, detach it slowly to avoid splitting it.

Dispose of product in regular household waste.

Please note: Everyone has their own specific sensitivity to heat. At high altitude (above 2000m) or at low temperatures (<0°C), the activation of the warmer can be difficult so put it inside jacket pocket close to your body for minimum 10 min.

Precautions for use:

For external use only. **Never place the heating pad directly on the skin.** Improper use may cause burns. Do not use on sandals, rubber boots or shoes which are not sufficiently enclosed: in open air warmer's temperature is going high (>50°C) in a short time. Do not stick the foot warmer to socks that are too fine, such as tights, to avoid any risks of burns. Do not use the foot warmers for in-

tense sport activities (running, etc) to prevent excessive heat and splitting of the foot warmer. Remove the warmers if it gets too hot, if it causes a rash, irritations or causes dizzy spells. Do not use at the same time as creams, ointments, external analgesics or other heating devices. Do not stick 2 foot warmers to the same foot. Do not use while sleeping. Do not apply to frostbite or desensitised skin. Consult a doctor before use in case of diabetes, delicate or sensitive skin, blood circulation problems, paralysis or damaged nerves, rheumatoid arthritis, pregnant women or in the event of any uncertainty regarding the product. Do not allow the contents of the warmer to come into contact with the eyes or the mouth. Do not swallow. If swallowed, immediately consult a doctor and show the packaging. Keep out of reach of babies and children. Children as well as elderly or disabled people should use this product carefully and under supervision. Keep in a cool and dry place away from sunlight. Do not open or perforate the warmer. Do not heat in an oven or a microwave.

Best before: see individual bag.

Composition: Iron Filings, water, activated carbon, vermiculite, super absorbent polymer, salt.
