Note
Your product's appearance may differ from the illustrations in this document. Color highlighting is for instructive purposes only.

Hinweis
Das Aussehen Ihres Produkts kann von den Abbildungen in diesem Dokument abweichen. Farbliche Hervorhebungen dienen lediglich der Verdeutlichung.

Aviso
El aspecto de su producto puede no coincidir con el que se muestra en las ilustraciones o fotografías de este manual. Las piezas aparecen resaltadas en color sólo a modo informativo.

Remarque
L'apparence de votre composant peut différer des illustrations de cette notice. Les surlignages en couleur ne sont utilisés que pour vous aider à comprendre les instructions.

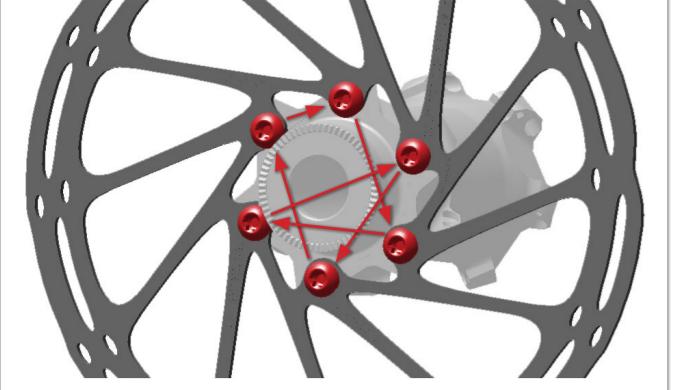

Nota
L'aspetto effettivo del prodotto potrà essere diverso dalle illustrazioni contenute nel presente documento. I colori sono evidenziati unicamente a scopo didattico.

Opmerking
Het uitzicht van uw artikel kan verschillen van wat op de illustraties in dit document is weergegeven. De kleurmarkeringen zijn alleen bedoeld voor instructieve doeleinden.

Nota
O aspecto do seu produto pode ser diferente das ilustrações deste documento. As cores que se mostram são apenas para fins de instrução.

注意
お買い上げの製品の外観は本マニュアルのイラストとは異なる場合があります。該当部位のカラー表示は、手順説明のために行っているものです。

注
您的产品外观可能与本文件图示有异。色彩辉亮仅用作说明。

1 5.2 N·m (55 in-lb)
Tighten the rotor bolts 1 turn in an alternating sequence until a torque of 6.2 N·m (55 in-lb) is achieved for each bolt.

Ziehen Sie die Schrauben der Bremscheiben abwechselnd um eine Umdrehung fest, bis für alle Schrauben ein Drehmoment von 6.2 N·m erreicht ist.

Apriete 1 vuelta los tornillos del rotor de manera alternada, hasta alcanzar un par de 6.2 N·m para cada tornillo.

Serrez les boulons du disque d'un tour, en croix, jusqu'à obtenir un couple de 6.2 N·m pour chacun.

Serrare i bulloni del rotore di un giro, in una sequenza alternata finché non si ottiene una torsione pari a 6.2 N·m per ciascun bullone.

Draai de rotorbouten 1 volledige draai in een afwisselende volgorde vast totdat een aanhalingssom van 6.2 N·m voor elke bout wordt bereikt.

Aperte os pernos do rotor uma volta, numa sequência alternada, até conseguir obter um momento de torque de 6.2 N·m para cada um dos pernos.

ローターのボルトを1回転の順番で、1回転ずつ締めて行き、すべてのボルトが 6.2 N·m のトルク値になるようにします。

交替拧紧每个刹车碟螺栓，每次旋转一圈，直至达到 6.2 N·m 扭矩。

2
Use the illustration to determine if you have a CPS or Standard caliper. Consult the Disc Brake Caliper Mounting manual that comes with your brake or online at www.sram.com/service for the correct mounting bracket and spacer configuration needed for your fork/frame mount, rotor size, and caliper.

Bestimmen Sie anhand der Abbildung, ob an Ihrem Fahrrad ein CPS- oder ein Standard-Bremssattel montiert ist. Die richtige Halterungs- und Distanzstück-Konfiguration für die Größe Ihrer Brems Scheibe und Ihren Bremssattel zur Gabel-/Rahmenmontage finden Sie in der mit Ihrer Bremse gelieferten Bedienungsanleitung für Scheibenbremssattel-Halter oder online unter www.sram.com/service.

Observe la ilustración para determinar si su bicicleta lleva una pinza estándar o del tipo CPS. Para determinar la configuración de espaciadores y soporte más adecuada para el tamaño de la pinza y del rotor con fijación a la horquilla o el cuadro, consulte el manual de fijación de la pinza del freno de disco o nuestra página web www.sram.com/service.

Observer l'illustration pour savoir si vous possédez un étrier CPS ou standard. Pour savoir quelle est la configuration correcte des bras et des supports nécessaires au montage de votre fourche/cadre, installez les entretoises nécessaires au montage de l'étrier en fonction de la dimension du disque et de la configuration de votre fourche/cadre, consultez le manuel de montage des étriers de frein à disque fourni avec les freins ou disponible en ligne sur www.sram.com/service.

Utilizzare la figura per determinare se ci possiede una pinza CPS o Standard. Consultare il manuale di montaggio della pinza per freno a disco fornito con il freno o disponibile all'indirizzo www.sram.com/service, per individuare la corretta configurazione dei distanziatori e della staffa di montaggio necessaria per la pinza e la misura del rotore.

Gebruik de afbeelding om te bepalen of u een CPS of een standaard remklaauw hebt. Raadpleeg de Montagehandleiding van de schijfremklaauw die met uw rem is meegeleverd of online op www.sram.com/service voor de juiste montagebeugel-en afstandhouderconfiguratie die voor de rotorgroting van uw werkframe/rame remklaauw vereist is.

Utilize a ilustração para determinar se tem uma Maxila de travão normal ou CPS. Consulte o manual de Montagem da Maxila do Travão de Disco que vem com o seu travão ou o site online em www.sram.com/service para o suporte de montagem correto e a configuração de espaciadores necessária para a montagem da horquilha/quadro, tanto quanto a medida do travão.

图を参考して、ご自分の自転車のキャリパーが CPS または標準のどちらであるかを確認してください。また、キャリパーとブレーキ径の大きさ、そしてマウントとマウント間隔を正しく正しく取り付けられたベアリングの設定について詳しくは、ブレーキに同梱されているディスクブレーキ・キャリパー取り付けマニュアルまたは www.sram.com/service の情報を参照してください。

利用本图确定您拥有的是 CPS 还是标准刹车钳。查阅自行车随附的《盘式刹车钳安装手册》或 www.sram.com/service，了解根据您自行车前叉/车架的安装刹车钳尺寸与刹车钳，您需要的正确托架和垫片配置。

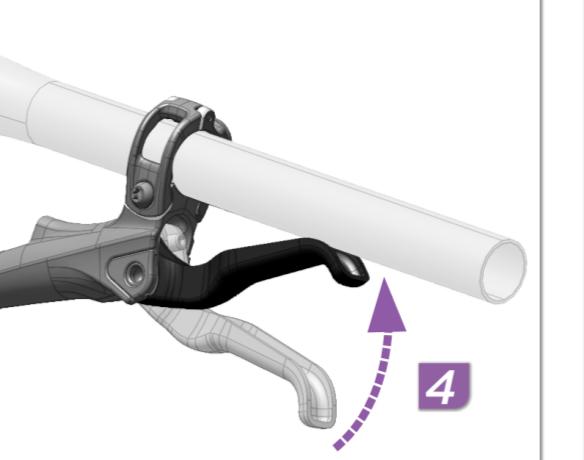

CPS Caliper

Standard Caliper

IS Mount

Post Mount

3.1 9-10 N·m (80-90 in-lb)

Install Loosely.

Montieren Sie die Teile lose.

Instalar sin apretar.

Installare senza stringere.

Mak losjes vast.

Instale sem apertar.

緩めに取り付けます。

松散地安装。

3 9-10 N·m (80-90 in-lb)

Tighten.

Spannen Sie die Teile fest.

Instalar sin apretar.

Installare senza stringere.

Mak losjes vast.

Instale sem apertar.

緩めに取り付けます。

松散地安装。

4 9-10 N·m (80-90 in-lb)

Squeeze 5 times then hold.

Um die Bremse zu zentrieren, betätigen Sie 5-mal den Hebel, und halten Sie ihn gezogen.

Para centrar el freno, oprimalo cinco veces y déjelo oprimido.

Pour centrer le frein, serrez le levier 5 fois puis maintenez-le serré.

Om de rem te centreren, knip deze 5 maal dicht en houd vervolgens vast.

Para centrar o travão, aperte 5 vezes a alavanca com a mão e depois segure-a.

プレーキを中央にするには、5 回握り込んでから保持します。

压刹车五次，然后握住，使刹车居中。

5 9-10 N·m (80-90 in-lb)

Release.

Entfernen Sie den Hebel und überprüfen Sie, ob die Scheibe schleift.

Apriete los tornillos de la maneta alternada con un par de entre 9 y 10 N·m.

Serrez les boulons en croix à couple de 9 à 10 N·m.

Relâchez et vérifiez si le disque frotte. Si vous notez un frottement, répétez les étapes 3 à 6.

Rilasciare e controllare il trascinamento del rotore. Se viene rilevato trascinamento, ripetere i passi 3-6.

Solte e verifique se o roto arrasta. Se detectar arrastamento, repita os passos 3 a 6.

リリースして、ローターの抵抗を調べます。抵抗がある場合は、ステップ 3-6 を繰り返します。

6

Release and check for rotor drag. If drag is detected, repeat steps 3-6.

Ziehen Sie die Schrauben abwechselnd mit 9 bis 10 N·m an.

Apriete los tornillos de la maneta alternada con un par de entre 9 y 10 N·m.

Serrez les boulons en croix à couple de 9 à 10 N·m.

Relâchez et vérifiez si le disque frotte. Si vous notez un frottement, répétez les étapes 3 à 6.

Rilasciare e controllare il trascinamento del rotore. Se viene rilevato trascinamento, ripetere i passi 3-6.

Laat los en controler op rotorweerstand. Herhaal stappen 3-6 als u weerstand opmerkt.

Solte e verifique se o roto arrasta. Se detectar arrastamento, repita os passos 3 a 6.

リリースして、ローターの抵抗を調べます。抵抗がある場合は、ステップ 3-6 を繰り返します。

放开刹车，检查刹车碟是否拖动。如果检测出拖动现象，则重复第 3-6 步。

Maintenance Wartung Entretien

To maintain optimal braking performance, bleed hydraulic brakes at least once every 6 months. Bleed procedures are available at www.sram.com.

Inspect disc brake pads for wear every month. When the thickness is 2.5 mm or less, they are worn and need to be replaced with new disc brake pads.

Change the rotor when the thickness is less than 1.55 mm or when changing braking material.

Brake pads are a safety-critical component of a bicycle. Improper installation or use of brakes can result in loss of control of the bicycle which can lead to a crash that can cause severe injury and/or death. Follow the instructions in the user manual for proper installation.

Disc brakes offer increased stopping power over rim brakes, a tandem less effort to lock a wheel when braking. When a tandem locks up, the front wheel may lose control and lead to injury. Practice braking techniques on a flat level surface prior to aggressive riding.

Brakes are effective conditions over which SRAM has no control including: bicycle speed, braking force, condition of the bike, weight of the rider, weather, terrain, and a variety of other factors. Always ride under control.

It takes longer to stop in wet conditions.

To reduce the possibility of a crash avoid locking-up your wheels.

SRAM disc brakes are designed as a system. Do not use brake components from a manufacturer other than SRAM.

Only use DOT 4 or DOT 5.1 fluids with SRAM disc brakes. Do not use any other fluid, it will damage the system and make the brakes unsafe to use.

Do not allow any brake fluid to contact the brake pads. If this occurs, clean the pads with isopropyl alcohol.

Do not touch the braking surface of the rotor with your bare hands. The oils from your fingers will degrade braking performance. Always wear gloves or handle the rotor by the spokes.

Do not touch disc brake rotors or callipers immediately after use; they become very hot during use and could cause burns. Allow them to cool prior to making any adjustments.

Do not use radially spoked wheels.

The SRAM brake system is not intended for use on any motorized bicycle or vehicle. Such use could result in serious personal injury.
