Thank you for choosing a DOMYOS product and for the trust this demonstrates.

Whether you are a beginner or a high level athlete, DOMYOS is there to help you stay fit or increase your fitness. Our teams aim to always design the best products. However if you have any comments, suggestions and questions, you can voice them on our website: DOMYOS.COM. On the website you will also find training advice and support.

We wish you successful training and hope that you will enjoy using this DOMYOS product.

PRESENTATION

The stepper is a cardio-training exercise that reproduces the movement of going up stairs.

Regular exercise with the stepper will help you improve your physical fitness and endurance while burning calories (perfect for controlling and/or losing weight when combined with a balanced diet).

In addition to the cardio-vascular and respiratory benefits of the exercise, the stepper tones the buttocks, thighs and calves with impact-free movements.

You can strengthen your shoulders, pectorals and arms thanks to the elastic straps which attach to the device.

WARNING

Getting into shape must be done in a CONTROLLED manner. Before beginning any exercise program, consult your doctor. This is especially important for people aged over 35 or who have previously had health problems, and those who have not done any sport for a number of years. Read all instructions before use.

GENERAL RECOMMENDATIONS

- 1- The owner is responsible for ensuring that all users of this product are properly informed as to how to use this product safely.
- 2- DOMYOS cannot be held liable for claims of injury or damage sustained by any person or property originating from the use or misuse of this product by the purchaser or by any other person.
- 3- Do not use this product in a commercial, rental, or institutional setting.
- 4- It is the user's responsibility to inspect and if necessary tighten all parts before using the product.
- 5- Any assembly or disassembly of the product should be carried out with care.
- 6- Always wear sports shoes to protect the feet while exercising. Wear appropriate clothing when exercising. DO NOT wear loose clothing that could get caught in moving parts. Remove jewellery. Tie long hair so that it does not get in the way when exercising.
- 7- If you feel any pain or if you become dizzy while exercising, stop immediately, rest, and consult a physician.

CONSOLE

DISPLAY

To switch the console on, start your training session or press the central button. Press the central button once again to display the information of your choice.

- Number of steps ascended per minute
- Total number of steps ascended
- Time elapsed
- Estimation of calories burned

Selecting the mode allows you to scroll through the information continuously.
To reset the console, hold the central button down for 3 seconds. The console switches itself off automatically if not used for a period of 4 minutes.

TROUBLESHOOTING

- No display: Check the batteries and replace them if necessary. Use one UM3 or AA 1.5 V battery and make sure that it is connected with the correct +/- polarity.
- Problem with the counter: Check that the cables at the back of the console are connected.

RECYCLING

The "crossed-out bin" symbol indicates that this product and the batteries it contains cannot be disposed of with household waste. They are subject to specific sorting. Take the batteries and your unusable electronic product to an authorised collection area for recycling. Recycling your electronic waste will protect the environment and your health.

USAGE

Always start by warming up slowly for several minutes.
Lift up your feet before pushing the pedals down onto the base unit to exercise more effectively and protect your joints.

Please note that the pedal's movements are dependent upon one another.
Note also that the resistance of the pedals depends on the speed of use.

To increase the aerobic intensity of the exercise, perform the exercise more rapidly (20 - 25 min).
For this type of exercise, train at least three times a week.

To improve muscle tone, perform the exercise rapidly in series broken up with rest periods. For this type of exercise, you can train every other day.

EXERCICES

BASE POSITION:

In a completely vertical position, with your back straight, abdominals tensed and pelvis forward, push down on your heels with your arms bent.

LOCATION OF MUSCLES BEHIND YOUR THIGHS

The muscles located behind your thigh enable you to bend your legs and bring your heel to your buttock.

All you need to do on the stepper is to try to reproduce this movement of the heel towards your buttock: to do this, lean slightly backwards to find a semi-seated position without leaning too far backwards.

LOCATION OF YOUR BUTTOCK MUSCLES:

To accentuate the movement of your buttock muscles, half-remove your feet from the pedals and tense your abdominal muscles in order to keep your back straight and avoid arching it.

LOCATION IN YOUR CALVES:

To really exercise your calves you just need to work on the tips of your feet.

You can strengthen your shoulders, pectorals and arms thanks to the elastic straps which attach to the device.

SALES WARRANTY

DOMYOS guarantees this product, under normal conditions of use, for a period of 5 years for the structure, 2 years for the other parts and labour, starting on the date of purchase as shown on the receipt.
